

VAPORTEK® TECHNICAL DATA

The Heavy-Duty Stand-Alone Deodorizer Cartridge

Designed specifically for use in HVAC systems!

Cartridges available in 3X Industrial and S.O.S. (Smoke Odor Solution) formulas!

Adjustment tabs/vertical stand

Permanent rotating aluminum end cap for control of vapor output (located on both ends of cartridge)

Airflow apertures

Non-toxic, liquid-filled odor control membrane sealed in a durable cartridge

An optional stabilizer helps keep the cartridge in the desired position.

A popular application for this product is with high-volume air dryers after carpet cleaning or floods!

PURPOSE

The Vaportek Heavy-Duty Stand-Alone Cartridge is designed as a passive odor controller specifically for use in HVAC systems, including high-velocity air cleaners and air dryers, as well as for use in disaster restoration work. The cartridge contains a patented membrane that releases a non-toxic odor controller into the air. The liquid odor-control compounds contained inside the cartridge are complex blends of natural oils. The deodorizer compounds have been used by Vaportek in installations worldwide since 1979 to control odors in healthcare facilities, offices, factories, hotels and homes.

PLACEMENT

The Stand-Alone Cartridge is available in the 3X Industrial formulation for all types of organic odors, and in the S.O.S. (Smoke Odor Solution) formula, designed specifically for treating all types of smoke odors. The cartridge may be located on the suction or pressure side of any air handling system. For maximum output, the unit should be laid on its long side, and the two rotating end caps opened fully to allow air through the cartridge. An optional, reusable stabilizer can be placed on the cartridge to help keep it in position. Where air currents are very strong, the unit may be fastened into place by using duct tape or double-backed adhesive tape. The unit may also be placed in front of high-volume air dryers to provide fast and efficient odor control after carpet cleaning.

FEATURES AND BENEFITS

The Vaportek Heavy-Duty Stand-Alone Cartridge provides immediate and powerful odor control in areas where most systems cannot. The dry vapor deodorizer quickly permeates all porous surfaces it contacts. Odor-contaminated surfaces can be reclaimed using the Vaportek odor-control system to eliminate imbedded odors. It requires no noisy fogging apparatus or evacuation of treatment areas as with ozone machines. It does not require electricity.

SELECTED SPECIFICATIONS

- Reorder #90-2200 (3X) and #90-2200-85 (SOS).
- Case pack: 6 each. Case weight: 6 lbs./3 kg.
- Dimensions: 5.75"H x 3.75"D.
- Lasts from 270 hours to 90 days, depending on application.
- Treats areas up to 20,000 cubic feet.
- Rotating end caps allow for precise output control of deodorizer vapor.
- Optional reusable cartridge stabilizer, #90-2201.
- Made in the USA.

TRY US FIRST...WE'RE ALL YOU'LL NEED!

IMPORTANT: This system provides a safe, effective alternative to ozone. It is not recommended for use with ozone-generating equipment.
