

# ODOR CONTROL SOLUTIONS FOR THE Bio-Recovery Industry

## Safe for you. Safe for the environment.

### Unique "dry vapor" systems treat atmosphere, structure and contents simultaneously!

Vaportek manufactures air treatment products that meet the needs of customers in a wide range of industries and situations—wherever problem odors are encountered.

Vaportek's proprietary technologies provide tangible benefits:

- RAPID, POWERFUL DEODORIZATION
- NATURAL ESSENTIAL OIL TECHNOLOGY
- EXCELLENT ALTERNATIVE TO OZONE GENERATORS, THERMAL FOGGERS AND HYDROXYL GENERATORS
- PROMOTES A SAFE WORKING ENVIRONMENT
- NON-TOXIC, VOC-COMPLIANT
- TESTED AND PROVEN AROUND THE WORLD...SINCE 1979!

Eliminating odors is an important component in the total process of Bio-Recovery Services. Immediate response and the use of appropriate treatment methods are crucial to the success of the deodorization process.

It's also important that the methods and products used to improve those environments are safe for contractors and residents alike—as well as the atmosphere, contents and structure.

With Vaportek's **environmentally preferable** odor control and air treatment systems and products, you can be assured of "naturally" effective results, safe application and use, and minimal waste generation to help protect the environment.

Vaportek products:

- Do not generate ozone and are not subject to ozone restrictions.
- Contain no alcohol or petroleum distillates.
- Are CFC-free and do not deplete the ozone layer.
- Generate minimal waste.
- Contain non-toxic formulations of natural ingredients.
- Do not require evacuation of treatment areas during use.

**TRY US FIRST... WE'RE ALL YOU'LL NEED!**

## What Customers Say:

- ◆ "Vaportek is a better way of doing business."
- ◆ "We are having better success with Vaportek than any other manufacturer we've tried."
- ◆ "The product was so effective—and a lot safer than ozone—that we stopped using ozone."
- ◆ "I tested the (Vaportek technology) and it surpassed all my expectations."

## VAPORSHARK

The popular VaporShark Industrial Odor Control System aggressively attacks difficult odors in areas up to **50,000 cu. ft.** The compact, durable system is designed to hold up to five VaporShark membranes. These sealed membranes contain a proprietary compound of natural oils that are safe, effective and provide long-lasting odor neutralization. The dry-vapor system does not require evacuation of the treatment area during use. With a durable aluminum case, the unit weighs less than 14 lbs. Typical membrane life is 270 hours.

## PORTABLE INDUSTRIAL

The Portable Industrial unit is ideally suited for very large bioremediation or restoration projects, as well as commercial, industrial, healthcare and hospitality facilities. Capable of treating areas up to **200,000 cu. ft.**, the machine holds up to 10 industrial membranes. It can be used free-standing or permanently installed in an HVAC system. Adjustable inlet/outlet openings. Lightweight, durable aluminum case with carrying handle and durable locking latches. Average membrane life is 270 hours.

## RESTORATOR

The Restorator is a simple-to-use, portable unit that quickly, safely and effectively renews interior space. Using Vaportek's patented essential oil membrane technology, a non-toxic, odor-neutralizing dry vapor is diffused into the air. This penetrating dry vapor quickly eliminates malodors resulting from trauma scenes, fire and flood damage, as well as imbedded odors from food, cigarette smoke and other biological sources. A safe, effective alternative to ozone cleaning, the Restorator will not harm fabric, rubber, adhesives or electrical components, nor remove pigment from leather. Unlike foggers, moisture is not introduced into the treatment area. Replaceable cartridges provide up to 270 hours of service; treat areas up to **20,000 cu. ft.**

## HEAVY-DUTY STANDALONE CARTRIDGE

The Vaportek Heavy-Duty Standalone Cartridge is a passive odor controller for use in HVAC systems or with high-velocity blowers. The cartridge contains a membrane filled with natural essential oil compounds that release a non-toxic odor-controlling dry vapor into the air. Rotating end caps allow precise control of vapor output. The cartridge is safe, effective and provides long-lasting neutralization without creating ozone or leaving any residue. Discourages vandalism or tampering when placed out of sight in air ducts. Does not require electricity, fogging apparatus or evacuation of treatment areas. Optional stabilizer keeps cartridge in desired position. Cartridge treats areas up to **20,000 cu. ft.**
